TERMINATION DOCUMENTATION

1. License termination meets Type I criteria: Y N

___ Licensee used sealed sources only and the most recent leak test demonstrates that they did not leak while in the licensee's possession

___ Licensee used radioactive material with $T_{1/2} \leq 60$ days and it has decayed to less than the activity in 10 CFR Part 20 Appendix C

2. License termination meets Type II criteria: Y N

___ Licensee possessed and used only sealed sources but cannot demonstrate that the sources did not leak while in the licensee's possession

___ Licensee possessed unsealed radioactive material with $T_{1/2} \leq 60$ days but the maximum activity authorized under the license has not decayed to less than the quantity specified in 10 CFR Part 20, Appendix C

Licensee possessed unsealed radioactive material with $T_{1/2} > 60$ days but ≤ 120 days. *in the early 1960's the licensee possessed small quantities of RAM @ $T_{1/2} > 120$ days.*

Licensee possessed ^{14}C or ^3H but the total activity(s) and use authorized under the license warrants decommissioning under Type II (describe rationale above)
