Subject: **Correction to Material License No. 21-02335-04**

Dear Ms. Simmons,

In September of this year, after reviewing Amendment No. 28 of Material License No. 21-02335-04, I contacted you via phone about the criteria of section 17-A concerning shutter testing. Upon review, I found that the criteria of 17-A did not match the requested shutter testing frequency of the submitted NRC Form 313. At the time of our conversation, you agreed and said a corrected License would be forthcoming. As of the above date, I have not received a corrected Amendment No. 28 of License No. 21-02335-04. If additional information is needed to process this correction please contact me.

Sincerely,

Thomas M Lashley
