Subject: Weather Conditions - Docket: 40-8964

To Rick, Steve and John:

I wanted to inform you that it is likely that PRI will not be able to sample all the monitor wells at the
SR-HUP this week as scheduled and required by permit and license. This does not happen very often, but
as you know, we had a pretty severe snow storm here over the weekend. Probably 8-10 inches at the site.
I was not here yesterday before the wind started blowing, but we did get about 90% of the wells sampled
(about 14 could not get accessed) on Monday November 29.

Today is a different story. The wind started last night and has made huge drifts. Beside difficulties in
getting to the wells, the blowing snow is freezing up the carburetors on the trucks, preventing them from
running and creating a safety concern for employees. We received permission from NRC and WDEQ to
"miss" a sample round for several groups of wells during a similar situation a year or so ago. We are going
to need some kind of relief for this storm as well.

Could you please contact me via email or phone on how to proceed with this request. It is very nasty out
there!

Thanks
