

December 17, 2004

Gary N. Wright, Assistant Director
Illinois Emergency Management Agency
1035 Outer Park Drive
Springfield, IL 62704

Dear Mr. Wright:

On October 28, 2004, your office submitted, to the NRC, the final revisions to the Illinois regulations, 32 Ill. Adm. Code 350, "*Radiation Safety Requirements for Industrial Radiographic Operations*," and 32 Ill. Adm. Code 351, "*Radiation Safety Requirements for Wireline Service Operations and Subsurface Tracer Studies*." Our initial review of these final regulations identified several issues which were identified in our January 20, 2004 review of the proposed regulations, that still remain unresolved.

We discussed our review of the regulations with Ted Henry of your staff on December 1 and 10, 2004 which included a clarification of the compatibility levels. As a result of this discussion, Mr. Henry stated that Illinois will re-evaluate the final regulations for any applicable revisions and send a revised final rule for our review. Therefore, we plan no further action on your October 28, 2004 submittal. We will initiate a new review upon receipt of your revised final rule.

If you have any questions regarding our comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Jim Lynch at (630) 829-9661 or jll2@nrc.gov.

Sincerely,

IRA By K.N. Schneider For
