

December 9, 2004

Mr. Ronald D. Izatt
ISF Facility Manager
Tetra Tech FW Inc.
3200 George Washington Way, Suite G
Richland, WA 99352

SUBJECT: CORRECTION TO MATERIALS LICENSE NO. SNM-2512 FOR
THE IDAHO SPENT FUEL FACILITY (TAC NO. L23389)

Dear Mr. Izatt:

On November 30, 2004, the U.S. Nuclear Regulatory Commission (NRC) issued Materials License No. SNM-2512 to the Foster Wheeler Environmental Corporation (FWENC) for the Idaho Spent Fuel (ISF) Facility. The license was issued in response to your application dated November 19, 2001, as supplemented and revised. The license constitutes authorization for a 20-year term to receive, possess, store, and transfer spent fuel and associated radioactive materials as specified therein at the ISF Facility, to be located at the Idaho National Engineering and Environmental Laboratory in Butte County, Idaho.

Upon receipt of the license, your staff notified us of some typographical errors in the licensing documents. Specifically, License Condition 15 incorrectly cited "10 CFR 72.30©" in 2 places, instead of "10 CFR 72.30(c);" Technical Specification (TS) Surveillance Requirement SR 3.4.1.1 on page 27 referred to a "Fuel Packaging Area" exhaust fan, instead of a "Transfer Area" exhaust fan; and TS pages 34 and 35 were incorrectly marked as pages 35 and 36. Enclosed are the corrected pages for the license and Technical Specifications.

We apologize for any inconvenience this may have caused. If you have any questions regarding this matter, please contact me at (301) 415-8500.

Sincerely,

/RA/
John D. Monninger, Chief
Licensing Section
