<b>Subject:</b> void amendment request		
<p>I discussed with Andy that since this amendment request, 135935, to name him as RSO has become an issue with the separate renewal of the license action, 135928, that he will send a fax to void the amendment request. He will state that the issue of naming him as RSO will be dealt with in the renewal. With the renewal application that he will be resubmitting, he will convert the existing TypeB/limited scope hybrid license into a true limited scope license and list AU's. He will also review the radionuclides and possession limits and see if any of these can be eliminated or reduced. We are taking these steps since his background and experience are limited and naming him as RSO to a scaled down limited scope license would be more appropriate than naming him as RSO for a TypeB broad scope. Andy said he would fax this request to me next week (week of 12/27/04)</p>
