 License No: 37-30452-01

03034747

Dear Mr. Rolph:

On behalf of Anchor Hocking Operating Company, LLC (Anchor Hocking), August Mack Environmental, Inc. (August Mack) is providing this submittal in response to the additional information requested by the NRC. The following addresses six (6) items listed in the *Information Needed for Transfer of Control* (copy attached) provided by David Everhart of the NRC:

1. On April 13, 2004, a transfer of stocks from Newell Rubbermaid, Inc. to the GIIP Operating Company, LLC included Anchor Hocking and marked the company name change from Anchor Hocking, Inc. to Anchor Hocking Operating Company, LLC. Mr. Robert Bittner, Facilities Supervisor, remains the licensee contact for the NRC and can be reached at (724) 773-3219.
2. No changes in personnel or duties have occurred relating to the licensed program.
3. No changes in the organization, location, facility, equipment, or procedure have occurred relating to the licensed program.
4. The transfer of stock did not affect anchor Hocking's surveillance program.
5. Equipment, records, programs, and all other property were safely and effectively decommissioned during the transfer of stocks.

6. Anchor Hocking Operating Company, LLC will abide by all constraints, conditions, requirements, and commitments of the licensed program.

We trust that this submittal is responsive to your needs. If you have any questions or need additional information, please feel free to contact us at (614) 798-9922.

Sincerely,

Scott S. Mounts, P.E.
Senior Engineer/Office Manager

Information Needed for Transfer of Control**Definitions:**

Control: Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Licensees must provide full information and obtain NRC's *prior written consent* before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.
2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.
3. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.
4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.
