Central Industrial Service
ATTN: Mr. Jose A. Mercado
Operations Manager
P. O. Box 2020 #131
Barceloneta, PR 00617-2020

SUBJECT: TRANSMITTAL AND EXPLANATION OF LICENSE NO. 52-25470-01
(REFERENCE CONTROL NO. 258350; DOCKET NO. 030-35030)

Dear Mr. Mercado:

Enclosed please find your new NRC materials license. Please report to us in writing when you acquire material and begin operations with the portable gauges, as required by License Condition 21. You should also notify us if you decide not to obtain a gauge. You will note that we have authorized you to have the Model 500 series and the MC series which contain cesium 137 and americium 241 sealed sources.

This license has been written in the format in NUREG-1556, Volume 1, Consolidated Guidance About Materials Licenses, Program Specific Guidance About Portable Gauge Licenses, May 1997. If individuals are trained as Radiation Safety Officers in accordance with this document, no fee will be charged when amending the license to list them (see 10 CFR 170.11(a)(11)).

Please review the document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify this office (ATTN: Ms. Diane Heim at (404) 562-4723) so that we can provide appropriate corrections and answers.

Please be advised that your license expires as stated in Item 4. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR 19, "Notices Instructions and Reports to Workers: Inspection and Investigations"; 10 CFR 20, "Standards for Protection Against Radiation"; and other applicable regulations.
2. Not possess and use materials authorized in Items 6, 7, and 8 on the license until you have constructed the facilities and obtained the equipment described in the license application and supporting documentation.

NMSS/RGNI MATERIALS-001

3. Notify NRC, in writing, within 30 days:
 - a. when an authorized user or a Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or
 - b. when the licensee's mailing address changes (no fee is required if the location of byproduct material remains the same).
4. In accordance with 10 CFR 30.36(d) and/or license condition, notify NRC, promptly, in writing, and request amendment or termination of the license:
 - a. when you decide to terminate all activities involving materials authorized under the license; or
 - b. when you decide to terminate licensed activities in a separate building or outdoor area identified on your license; or
5. Request and obtain a license amendment before you:
 - a. order byproduct material in excess of the amount, or a different radionuclide or form, other than authorized on the license;
 - b. add to or change the areas of use or address (or addresses) of use identified in the license application or on the license; or
 - c. change ownership of your organization.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. Transfer of licensed materials must be consistent with 10 CFR 30.41, 40.51 or 70.42, as applicable. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

The NRC is required to have your Taxpayer Identification Number in order to make payments (refunds). The self-addressed, stamped NRC Form 531, "Request for Taxpayer Identification Number," is enclosed.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a Notice of Violation, or imposition of a Civil Penalty, or an order suspending, modifying or revoking your license as specified in the most current version of the "General Statement of Policy and procedures for NRC Enforcement Actions," NUREG-1600. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken against those who do not achieve the necessary attention to detail and standard of compliance expected of licensees.

Thank you for your cooperation.

Sincerely,

David J. Collins, License Reviewer
Division of Nuclear Materials Safety
