re: License No. 37-30485-01 **EXPEDITED REVIEW REQUESTED**

Dear Sir or Madam:

Please amend our license to permit the relocation of our brachytherapy source storage room to room. The room is a former office located on the 5th floor in the Radiology Department. (Note: The administrative director for radiology is also responsible for radiation oncology.)

The sources are housed in a shielded safe with combination lock, thereby limiting access to the sources. Access to the sources further restricted by a key operated lock on the door to the room. Distribution of the key will be appropriately limited. The safe will be posted with a "Caution - Radioactive Material" sign with the standard radiation warning symbol; however, the room will not be posted.

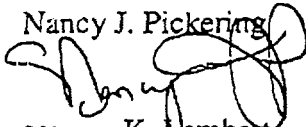

Radiation levels on contact with the safe are 0.1 millirem per hour, except at the combination lock where the radiation level is 16 millirem per hour. The highest radiation level at 1 meter is 0.3 millirem per hour.

The room is not occupied. No flammable or explosive materials are stored in the same room with the safe. The room is equipped with automatic fire suppression (sprinklers).

If you have any questions, or if you need any additional information, please contact Kent Lambert, Radiation Safety Officer at 215.762.8768. If I can be of assistance, please do not hesitate to contact me.

Sincerely,

Nancy J. Pickering
