SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of a license amendment to Molycorp, Inc. (Molycorp or licensee) for Materials License No. SMB-1393, to authorize an alternate decommissioning schedule for its facility in Washington, Pennsylvania. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

Attachment

II. EA Summary

The purpose of this proposed action is to allow the licensee to decommission its facility in a phased approach which will take longer than the two year period identified in the approved decommissioning plan (DP). Following an extensive supplemental characterization study, Molycorp found that there is a large volume of contaminated material in the subsurface. Molycorp will excavate the contaminated soils and transport them off-site to an NRC approved facility. Molycorp's proposed alternate decommissioning schedule shows that all decommissioning activities will be completed by the end of 2007. Molycorp's request is contained in a letter to NRC dated October 22, 2004.

An earlier, and more extensive, Environmental Assessment (EA) was prepared for License Amendment No. 5, in support of the NRC staff evaluation of Molycorp's final DP. The NRC staff determined that all steps in the proposed decommissioning could be accomplished in compliance with the NRC public and occupational dose limits, effluent release limits, and residual radioactive material limits. In addition, the staff concluded that approval of the decommissioning of the Molycorp Washington, PA, facility in accordance with the commitments in NRC license SMB-1393 and the final DP would not result in a significant adverse impact on the environment. The proposed action does not change the impacts analyzed in detail in the EA prepared for License Amendment No. 5.

If the NRC approves the license amendment, the authorization will be documented in an amendment to NRC License No. SMB-1393. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report in addition to the EA.

III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of Molycorp's proposed alternate decommissioning schedule. The NRC staff has concluded that there will be no adverse environmental impacts associated with granting Molycorp an alternate decommissioning schedule. The impacts associated with this proposed action do not differ significantly from the impacts evaluated in the EA for approval of the DP in License Amendment No. 5. On the basis of the EA, the NRC has concluded that the environmental impacts from the action are expected to be insignificant and has determined not to prepare an environmental impact statement for the action.

IV. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agency-wide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The ADAMS accession number for the documents related to this notice are: Molycorp's letter to NRC dated October 22, 2004, ML043090063; EA prepared for License Amendment No. 5, ML003735909; EA prepared for this action, ML050330004; Molycorp's final DP, ML010540178; Federal Register Notice for Amendment No. 7, ML050030165. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr@nrc.gov.
