Subject: Fwd: RII Comments on Post-Fire Manual Actions Criteria

Here's Bob's feedback. It was based on my earliest version of the criteria (i.e., prior to Jim and Dick's update). I'll look at it and see if some of the concerns (other than the shall vs. should, which I believe has been resolved in favor of the shall) still remain in the latest version. Please do likewise, using the version I sent out yesterday (after the meeting) and let me know if you think we should make changes (and where).
