Dick,

You should probably include that the manual actions in question are those associated with III.G.2. The FRN seems to infer all manual actions.

At the request of OE, I have prepared an FRN to inform all members of the public who do not attend the November 12 meeting of our interim criteria and their opportunity to submit written comments. I have taken the background information from the rulemaking plan SECY, but it should be reviewed to ensure that I have not misconstrued anything. Comments by COB tomorrow would be appreciated.

Thanks!!
