Were you able to get a good start on this? Please bring me up to date. Jim - if you'll be out next week, can you send me a list of documents where I can begin to find the material needed for the Reg. Guide on the criteria, at least the ones you're familiar with? I have NUREG/CR-5680, which probably covers the Environmental Qualifications. And Complexity and Number may have to wait for the RES Workshop. But I need some meat for the other ones.
