Subject: Re: OpManAx Outline for OGC

PREDECISIONAL INFORMATION

Let's work on it for a couple hours or so Tuesday afternoon. I'll share with you what we did for 805; the overall approach to the outline; our (SPLB and DRIP's) contents of the outline; and what it is that OGC feels is necessary for a quality SOC. We can then try to come up with a rough outline that you can refine. Sound okay?
