**Subject:** EPRI Document related to Fire Events

Ray et al:

Are you aware of an EPRI document (NSAC-178L), "Fire Events Database for US Nuclear Power Plants," January, 1993? The database was developed to help utilities prepare a response to the NRC's IPEEE's and contains information on 753 events from 1965 thru 1988. I found this reference in an NEA/CSNI document. It's supposedly quite detailed but, I don't know what the details cover. Anyone else have any knowledge of this stuff and its potential usefulness to operator manual actions??

Jim
