

U.S. NUCLEAR REGULATORY COMMISSION  
REGION I  
NOTICE OF LICENSEE MEETING

January 4, 2005

Licensee: PSEG Nuclear LLC

Facility: Hope Creek Nuclear Generating Station

Docket Nos: 05000354

Date/Time: January 12, at 7:00 p.m. **(Revision 1)**

Location: Bridgeport Holiday Inn  
One Pureland Dr.  
Interstate 295 at Exit 10  
Swedesboro, NJ 08085  
856-467-3322

Purpose: This is a NRC-requested management meeting with PSEG, open to public observation, to discuss the results of the NRC's special inspection into the circumstances surrounding the steam leak that occurred on October 10, 2004. The meeting will also include a discussion of the issues associated with the "B" reactor recirculation pump and the exhaust piping for the high pressure coolant injection pump. This meeting with PSEG, which was originally scheduled for January 5, 2005, was delayed to allow adequate time for NRC to complete its review of recently provided information associated with operation of the "B" reactor recirculation pump.

The NRC intends to release the preliminary findings of the special inspection team and the summary results of the NRC's review of the "B" reactor recirculation pump and high pressure coolant Injection system issues before the meeting. This meeting will be conducted prior to startup of Hope Creek from the ongoing refueling outage.

Background information on the Hope Creek Nuclear Generating Station can be found at the Salem and Hope Creek web-page on the NRC's website at: [www.nrc.gov/reactors/plant-specific-items.html](http://www.nrc.gov/reactors/plant-specific-items.html). Specific information on these technical issues can also be found in an ADAMS package, Accession Number ML043480164. ADAMS is accessible at: [www.nrc.gov/reading-rm/adams.html](http://www.nrc.gov/reading-rm/adams.html).
