In your renewal application you listed the sources under Dr. Caride's name, however I can issue a corrected copy giving you authorization for these sources and removing Per Halvorsen's name as an AMP.

Ms. Beardsley:

I received amendment #70 to Materials License # 06-00200-03 last week and have reviewed it. This amendment was a license renewal of the Hospital of Saint Raphael. There are two items that I wanted to bring to your attention:

Item 12C: Per Halvorsen resigned from the hospital effective July 31, 2004. For that reason, he was not included on the renewal application.

Item 12D: Since Dr. Caride is the Director of Nuclear Medicine, is he the appropriate individual to be named as the authorized user for non-medical devices (Cs-137 and Sr-90)? Does this category require naming an authorized user, or can an Authorized Medical Physicist be named?

Thanks for your help.

Sincerely,

Charles Gignac
Senior Physicist/RSO
