

December 29, 2004

Office of the Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001  
Attention: Rulemaking and Adjudications Staff

In the Matter of  
USEC, INC.  
(American Centrifuge Plant)  
Docket No.: 70-7004

Dear Madam Secretary:

In my letter to you dated December 23, 2004, I referenced the continued public unavailability of the USEC Application and Environmental Report ("ER"), due to security review considerations. The security review has been completed with respect to the Application and ER, which are now publicly available. The documents may be accessed through the NRC public website at: <http://www.nrc.gov/materials/fuel-cycle-fac/lic-app-docs.html>. You may also access the documents through the NRC's Citrix based Agency-wide Document Access and Management System ("ADAMS") at <http://www.nrc.gov/reading-rm/adams.html>. To access in ADAMS the USEC License Application (ML04320096) which includes the Quality Assurance Plan (ML043620245) as well as the Decommissioning Funding Plan (ML043620096), please use the referenced Accession Numbers. The Environmental Report may similarly be accessed by entering ADAMS Accession Number ML043620221.

This information may be relevant to the Commission's consideration of the six requests for extension of time to file intervention petitions in the proceeding that were filed on December 17, 2004.

Sincerely,

*/RA/*

Stephen H. Lewis  
Counsel for NRC Staff
