Ronda,

I talked to Tom Scarbrough and he agrees with my opinion that having a meeting prior to the steam dryer information being submitted on the docket is not a productive use of our time. Tom suggested that we hold a conference call after the information is docketed so you can walk us through the submittals. We believe that approach would be more beneficial in completing our review.

Thanks,

Rick

Rick,

Following is a proposed agenda for the requested full day meeting at NRC on Jan. 27th. We would appreciate if NRC would support a meeting with Entergy regarding the Steam Dryers, as discussed on the 12/21 call between VY and NRR.

We would like this to be an interactive working meeting (maybe from 8 a.m. - 4 p.m.)

- Morning:
- * Steam dryer power ascension test plan (45 mins)
 - * Approach and methodology for steam dryer analyses (45 mins)
 - * Benchmarking of acoustic analysis (1 hour)
 - * Computational fluid dynamics analysis (1 hour)
- After lunch:
- * Preliminary analytical results (subject to availability) (1 hour)
 - * Status (RAIs, etc.)
 - * Discussion of action items

Thanks,
Ronda
