**Subject:** Status of Licensee Response to August 11, 2004, NRC Letter Requesting Additional Information.

Note: This phone conversation was initiated because a phone call on November 22, 2004, and followup messages left for Mr. Balestracci on December 21, 2004 and January 5, 2005 did not result in the timely submittal of a written response to the licensing deficiency letter issued August 11, 2004 in support of license renewal.

The status of NRC requested information was discussed with Mr. Balestracci. He stated that he is working on the formal response document but it will be complete today and he intends to Federal Express the response letter to us this afternoon. He explained that the delay in providing a timely response was primarily related to the problems associated with our request for the licensee to provide technical justification for continued use of the Technical Operations 416 source changer which is currently approved on his license.

**Action Required/Taken:** Submit this document to ADAMS
