### SUMMARY

I called Mr. Bodnar for more detail re: his radiation-related training. His resume attached in this action (MC 136140) described some training, but no details. Mr. Bodnar described his training from Scienteck and Radiation Safety Associates. In both cases, the training was about 1 day in length with site-specific information related to radiation safety and handling/storing tritium-containing components provided by their consultants. Based on this info and my discussions with Mr. Bodnar, it appears he has adequate knowledge to be the RSO given the types and uses of licensed material on their license.
