Mailstop T-6D59
US Nuclear Regulatory Commission
Washington, DC 20555-0001

We repudiate the Commission's (NRC) and heavily subsidized industry's efforts to license new nuclear power plants despite unresolved safety and waste issues which include immunizing plant operators from liability in the event of a massive nuclear accident.

Stop wasting taxpayer monies for the most expensive and dangerous means for electrical power.

If you deem nuclear power is safe, why cannot you find a private insurance company to insure against an accident?

INVESTIGATION AID

Where would the waste go from two reactors since Yucca Mountin, if ever built, has capacity only through 2012?

What is the evacuation plan for the neighboring community and for Washington, DC, Richmond and Charlottesville?

Why are citizens being told they cannot raise issues of nuclear reactor safety and nuclear waste?

Sincerely,

cc:Nils J. Diaz, NRC
Thomas E. Capps, Dominion Resources
