Dear Secretary:

It has come to my attention that the NRC is now accepting public comment on the petition for "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors."

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

I urge the NRC to adopt the most stringent possible design regulations to prevent a potential catastrophe resulting from terrorist air strikes on vulnerable facilities at nuclear power plants. The expenditures for shielding these structures from terror attacks are urgently justified and should be implemented as soon as humanly possible.

Please do all you can to protect the many thousands of American lives now at risk without these shields in place. Thank you for considering my plea.

Respectfully,

Daniel Hodge
