ATTN: Rulemaking & Adjudications Staff

Dear Staff:

The vague fears about terrorism people  
felt and expressed about nuclear plants  
have come into chilling focus since 9/11.  
I write to urge that you require  
construction of "Beamhaze" shields at  
all reactors so that incoming planes would  
crash into this rather than the reactors themselves.  
I further urge you to upgrade your "design  
basis threat" regulations to require protection  
against attacks by terrorists in the numbers  
and with the capabilities shown on 9/11.

Yours,
