OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

It is my belief that the views expressed in the Committee to Bridge the Gap's (CBG) filed Petition for Rulemaking to the U.S. Nuclear Regulatory Commission (posted in the Federal Register on November 8, 2004, Volume 69, Number 215) for "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors" are valid and important for the safety of American citizens and the environment. We must take the steps needed to protect ourselves from possible future terrorist attacks, and sheltering the fuel rod pools is a relatively easy and inexpensive first step.

I encourage you to use your position to put regulations into effect which safeguard us and the earth on which we live.

Sincerely,

Melissa Ann Simmons

Cincinnati, OH 45211
