Subject: NRC

I strongly urge that the NRC upgrade the Design Basis for US nuclear power stations, revising DBT regulations to require NRC and the nuclear power industry to contemplate and prepare for an attack of nuclearpower stations by air by constructing shields consisting of I-beams and steel cabling to obstruct the angle of air attack at stand-off distances from the reactor building, fuel pool and other safety-related assets so that hijacked, rented or private aircraft attempting to deliberately crash into a reactor site would be torn up in the "Beamhenge" shield effectively reducing the impact and penetration force on safety-related structures..
