OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

To the Secretary at NRC,

If a nuclear plant's containment shell and reactor core, or spent fuel pools, are ever breached, a terrible explosion of radioactivity, on a par with the Chernobyl accident, would ensue. Millions of Americans would be placed in harm's way. America's nuclear plants are highly vulnerable to attack. Fortunately, such a cataclysm is preventable.

We ask for your support of the new petition before the Nuclear Regulatory Agency.

I also believe it is crucial that we now move our energy dependency from nuclear energy to renewable resources as quickly as possible, for the sake of our children, their children and all coming generations.

Thank you, Lorrie Ogren
