Secretary
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001
ATTN: Rulemakings and Adjudications Staff

Nuclear power reactors and spent fuel rods storage facilities are very vulnerable to terrorist attacks. I urge you to use "Red Team" methodology to assess the true vulnerability of EACH nuclear power facility, rather than a review from a distance or a theoretical review that does not have much chance of discovering actual vulnerabilities.

Thank you.
