Subject: nuclear plant safety upgrades

US Nuclear Regulatory Commission
Washington, DC 20555-0001
ATTN: Rulemakings and Adjudications Staff

Dear Secretary,

I am writing to encourage that the NRC upgrades the Design Basis Threat for U.S. nuclear power stations in a way that will prepare for an attack by air. I understand that there are form relatively inexpensive and quick-to-assemble structures that could be constructed to protect the fuel rod pools from attempts to deliberately crash aircraft into the pools. It seems reasonable to proceed as quickly as possible with plans that would reduce any risk of sabotage by planes. I am hopeful that the NRC will swiftly move toward measures that will safe guard the public against such a risk.

Sincerely,

Lonnie Lee, M.D.
6525 Belcrest Road
Hyattsville, MD 20782
