Subject: Please strengthen Nuclear power plant design basis threat regulations

(166)

To the members of the NRC:

I am a retired physics teacher (PhD Chicago University) had some hands-on experience with reactors at Oak Ridge some 40 years ago. I write to request your agency to strengthen the regulations to better protect our nuclear power stations from threats of terrorism. Structural-steel ring around sensitive areas (like a moat around a castle) would, I think, be a valuable and necessary first step.

Thank you for your consideration.
