Subject: Nuclear facility vulnerability

Secretary  
Nuclear Regulatory Commission  
Jan. 20, 2005

We have always known that protection from nuclear materials is part and parcel of the use of nuclear power.

Now that we are living in the age of high tech terrorism, we must respond. Designing structures to thwart potential breach of nuclear facilities can be a large part of such protection.

My work with Physicians for Social Responsibility over the last 30 years helps me understand the importance of prevention. I urge you to give high priority to developing structural changes and protections at nuclear facilities such as the proposed steel shielding that could thwart an air attack.
