

SYNOPSIS

This investigation was initiated by the U.S. Nuclear Regulatory Commission, Office of Investigations, Region II, on May 21, 2004, to determine if an Instrumentation & Control Technician (I&C Tech), at Florida Power and Light Company's St. Lucie Nuclear Plant (SLNP), deliberately failed to follow SLNP's procedure for obtaining a work order package and clearance, prior to conducting high voltage electrical work.

Based on the evidence developed during this investigation, the allegation that the I&C Tech deliberately conducted unauthorized work within the plant and deliberately failed to obtain a work order package, and clearance prior to conducting high voltage electrical work was substantiated.

APPROVED FOR RELEASE ON 1/24/05 -SES
