This facsimile is in response to our telephone conversation on January 7, 2004 about Boehringer Ingelheim's distribution license.

Boehringer Ingelheim does not distribute radiolabeled compounds. However, a scientist will occasionally ship small quantities of carbon-14 or tritium to a university as part of a cooperation study. As such, the ability to distribute was included in the license.

Sincerely,

A handwritten signature in cursive script, appearing to read "Patricia M López".
