Re: Amendment to USNRC License # 45-21206-01 HCA Pulaski Community Hospital

To Whom It May Concern:

Pulaski Community Hospital (PSK) wishes to amend its current USNRC materials license to reflect changes in staff. In the near future (approximately through April 2004) we will be operating with several temporary physicians. The Radiation Safety Committee convened on 11 December 2004 and discussed the credentials of the physicians involved and found them to be sufficient to meet the qualifications as listed in 10 CFR part 35 for their respective uses. Below please find a tentative outline of the authorized users we plan to have provide radiology coverage at PSK for the first part of 2005, and the change of Radiation Safety Officer. We will inform the Commission in writing when we have permanent nuclear medicine authorized users.

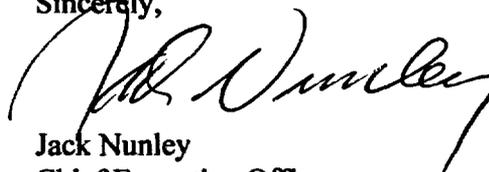

1. Add Authorized User(s): We would like to add **Rathnakara Sherigar, MD and Mohammed Naseem, MD** as Authorized Users to our materials license for uses as described in 10 CFR 35.100, 200, and 300. Drs. Sherigar and Naseem are currently listed on VHA permit #45-09669-02 (Salem, Virginia VAMC). Drs. Sherigar and Naseem will be providing weekend coverage to PSK for the foreseeable future.
2. Add Authorized User: We would like to add **Ricardo Burgos, MD** as an Authorized User to our materials license for uses as described in 10 CFR 35.100, 200. Dr. Burgos is certified by the American Board of Radiology in **Diagnostic Radiology** (June 2003), and you will find attached to this letter a copy of his medical license, board certification certificate, and USNRC form 313A. Dr. Burgos will be providing coverage at PSK from 1/10-14/2005.
3. Add Authorized User: We would like to add **D. Darrell Vaughn, MD** as an Authorized User to our materials license for uses as described in 10 CFR 35.100, and 200. Dr. Vaughn is certified by the American

Board of Radiology in Diagnostic Radiology (June 1997), and you will find attached to this letter a copy of his medical license, board certification certificate, and USNRC form 313A. Dr. Vaughn will be providing coverage at PSK from 1/17-28/2005.

4. **Add Authorized User:** We would like to add **Robert L. Cirillo, Jr., MD** as an Authorized User to our materials license for uses as described in 10 CFR 35.100, and 200. Dr. Cirillo is certified by the American Board of Radiology in Diagnostic Radiology (May 2000), and you will find attached to this letter a copy of his medical license, board certification certificate, and USNRC form 313A. Dr. Cirillo will be practicing at PSK from February 1, 2004 through April 2004.
5. **Add Authorized User:** We would like to add **David Buck, MD** as an Authorized User to our materials license for uses as described in 10 CFR 35.400, and 600. Dr. Buck is listed on USNRC License 45-09207-01 (Lewis-Gale Medical Center Salem Virginia) Dr. Buck will practicing in our cancer care center (New River Valley Cancer Care Center) **until further notice.**
6. **Add Authorized User:** We would like to add **John W. Rogers, MD** as an Authorized User to our materials license for uses as described in 10 CFR 35.400, and 600. Please find attached to this letter a copy of Dr. Buck's Virginia license to practice medicine and a copy of USNRC form 313A filled out by his preceptor at Wake Forest University Medical Center. Dr. Buck will practicing in our cancer care center (New River Valley Cancer Care Center) **until further notice.**
7. **Remove Authorized User:** We would like to **remove James Matthews, MD** from our radioactive materials license. Dr. Matthews is no longer practicing nuclear medicine at Pulaski Community Hospital.
8. **Remove Authorized User:** We would like to **remove David M Randolph, MD** from our radioactive materials license. Dr. Randolph is no longer practicing at Pulaski Community Hospital.
9. **Radiation Safety Officer:** We would like to change radiation safety officers from **James D. Matthews, MD** to **Lee S. Anthony, Ph.D.** Dr. Anthony has comprehensive certifications by the American Board of Health Physics and Certification in Radiologic Physics by the American Board of Radiology. He is also listed on our license as the Authorized Medical Physicist for 10 CFR 35.600 activities. Dr. Anthony is currently listed on VHA materials permit # 45-09669-02 as Radiation Safety Officer. Please find attached to this letter the signed delegation of authority for Dr. Anthony from the CEO of PSK.

If you have any further questions regarding this amendment request or would like to discuss it further do not hesitate to contact Dr. Anthony or myself. Dr. Anthony may be reached at (540) 563-0165 (office) or (540) 353-3139 (cell)

Sincerely,

A handwritten signature in black ink, appearing to read "Jack Nunley". The signature is fluid and cursive, with a large initial "J" and "N".

Jack Nunley
Chief Executive Officer

TRAINING AND EXPERIENCE AND PRECEPTOR STATEMENT (continued)

PART II - PRECEPTOR STATEMENT

Note: This part must be completed by the individual's preceptor. If more than one preceptor is necessary to document experiences, obtain a separate preceptor statement from each. This part is not required to meet the training requirements in 10 CFR 35.590.

Item 10 must be completed for Nuclear Pharmacists meeting the requirements of 10 CFR Part 35, Subpart J. Preceptors do not have to complete Items 11a, 11b, or the certifying statements for other individuals meeting the requirements of 10 CFR Part 35, Subpart J.

YES 10. The individual named in Item 1 has satisfactorily completed the training requirements in
 N/A 10 CFR 35.680 and is competent to independently operate a nuclear pharmacy.

YES 11a. The individual named in Item 1 has satisfactorily completed the requirements in Part 35, Section(s)
 N/A and Paragraph(s) 490(b), 690(b).

YES 11b. The individual named in Item 1. is competent to independently function as an authorized
 N/A User for 35.400 and 600 uses (or units).

12. PRECEPTOR APPROVAL AND CERTIFICATION

I certify the approval of Item 10 and certify I am an Authorized Nuclear Pharmacist;

OR

I certify the approval of items 11a and 11b, and certify I am an Authorized Nuclear Pharmacist;

OR

I certify the approval of Items 11a and 11b, and I certify that I meet the requirements of 10 CFR 35.490, 690
or equivalent Agreement State requirements to be a preceptor authorized User
for the following uses (or units) of byproduct material: 35.400 and 600

A. Address
Same as 9.D.

Duties and Responsibilities of the Radiation Safety Officer and Delegation of Authority

RSO's Duties and Responsibilities

The RSO's duties and responsibilities include ensuring radiological safety and compliance with NRC and DOT regulations and the conditions of the license. Model procedures for describing the RSO's duties and responsibilities appear below. Applicants may either adopt these model procedures or develop alternative procedures to meet the requirements of 10 CFR 35.24.

These duties and responsibilities include ensuring the following:

- Stopping unsafe activities involving licensed material;
- Radiation exposures are ALARA;
- Up-to-date radiation protection procedures in the daily operation of the licensee's byproduct material program are developed, distributed, and implemented;
- Possession, use, and storage of licensed material is consistent with the limitations in the license, the regulations, the SDR Certificate(s), and the manufacturer's recommendations and instructions;
- Individuals installing, relocating, maintaining, adjusting, or repairing devices containing sealed sources are trained and authorized by an NRC or Agreement State license;
- Personnel training is conducted and is commensurate with the individual's duties regarding licensed material;
- Documentation is maintained to demonstrate that individuals are not likely to receive, in one year, a radiation dose in excess of 10% of the allowable limits or that personnel monitoring devices are provided;
- When necessary, personnel monitoring devices are used and exchanged at the proper intervals, and records of the results of such monitoring are maintained;
- Licensed material is properly secured;
- Documentation is maintained to demonstrate, by measurement or calculation, that the total effective dose equivalent to the individual likely to receive the highest dose from the licensed operation does not exceed the annual limit for members of the public;
- Proper authorities are notified of incidents such as loss or theft of licensed material, damage to or malfunction of sealed sources, and fire;
- Medical events and precursor events are investigated and reported to NRC, and cause(s) and appropriate corrective action(s) are identified, and timely corrective action(s) are taken;

- Audits of the radiation protection program are performed at least annually and documented;
- If violations of regulations, license conditions, or program weaknesses are identified, effective corrective actions are developed, implemented, and documented;
- Licensed material is transported, or offered for transport, in accordance with all applicable DOT requirements;
- Licensed material is disposed of properly;
- Appropriate records are maintained; and
- An up-to-date license is maintained and amendment and renewal requests are submitted in a timely manner.

Delegation of Authority

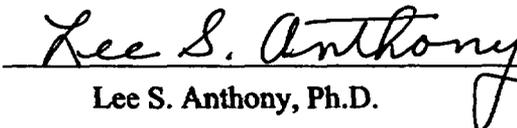

Memo To: Radiation Safety Officer
 From: Chief Executive Officer
 Subject: Delegation of Authority

You, Lee S. Anthony, Ph.D., have been appointed Radiation Safety Officer and are responsible for ensuring the safe use of radiation. You are responsible for managing the radiation protection program; identifying radiation protection problems; initiating, recommending, or providing corrective actions; verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations where justified by radiation safety. You are required to notify management if staff do not cooperate and do not address radiation safety issues. In addition, you are free to raise issues with the Nuclear Regulatory Commission at any time. It is estimated that you will spend 1 day per month conducting radiation protection activities.

I accept the above responsibilities,

 Jack Nunley, CEO
