1R11 Licensed Operator Requalification (71111.11B)

.1 Biennial Inspection

a. Inspection Scope

The inspector reviewed the annual operating examination test results for 2003. Since this was the first half of the biennial requalification cycle, the licensee had not yet administered the written examination. These results were assessed to determine if they were consistent with NUREG 102, "Operator Licensing Examination Standards for Power Reactors," Revision 8, Supplement 1, guidance and Manual Chapter 0609, Appendix I, "Operator Requalification Human Performance Significance Determination Process," requirements. This review included examination of test results for a total of 51 licensed operators, which included shift-standing senior operators, staff senior operators, shift-standing reactor operators, and staff reactor operators.

b. Findings

No findings of significance were identified.
