Dear Ms.Modes:

We have reviewed our complete files and were unable to locate a letter dated December 11, 1997. However we were able to find a letter dated December 18, 1997.

All samples from USEC-KY, USEC-OH and Bechtel Jacobs were screened using the following procedures. Immediately upon receipt, prior to opening, the cooler was measured for radioactivity using a Model 3 Ludlum survey meter. All samples received were below background (0.2 mr/hr).

If you should have any further question please feel free to contact me at (434) 847-2852.

Sincerely,

Adrian K. Mood
President / General Manager
