Subject: Sibley Memorial Hospital, 7/14/04 License Renewal Application

## Summary:

Ms. Krueger-Schmidt confirmed the following:

- 1) Sibley Memorial Hospital would like to retain all Authorized Users and Medical Physicists as listed on NRC License 08-07398-03 Amendment No. 23.
- 2) Each Am-241 sealed source appearing on the NRC License 08-07398-03, Amendment 23 has an activity less than 30 millicuries. We explained to Ms Krueger-Schmidt that possession of this isotope quantity is covered under 10 CFR 35.65 "Calibration, reference, and transmission sources" and no longer needs to be listed as a line item on the license, and will be removed when the license is renewed.
- Each Barium 133 source included in NRC License 08-07398 has an activity less than 30 millicuries. Ms. Krueger-Schmidt added that these sources are currently not in use and are in being stored in preparation for a future radioactive waste shipment. We explained to Ms Krueger-Schmidt that possession of this isotope quantity is covered under 10 CFR 35.65 "Calibration, reference, and transmission sources" and no longer needs to be listed as a line item on the license. Accordingly, authorization for "Barium 133 permitted by 10 CFR 35.500 will be removed from the license when the license is renewed.

Action Required/Taken: This telecon will be placed into ADAMS and referenced during license renewal.
