

TELEPHONE CONVERSATION RECORD

Licensee Name: Advanced Programs	Date: February 1, 1005	Time: 2:15 pm
License No.: 19-30986-01	Docket No.: 030-36810	Control No.: 136258
Licensee Contact: Rodney Dodd	Telephone No: 540-846-0725	
NRC Contact: Betsy Ullrich	Telephone No: 610-337-5040	

Subject: source/device information; mailing address

I spoke with Rodney Dodd regarding the material to be handled:
- he confirmed that they will be handling foils, replacing foils into detectors cells of Navy ACADA units. He confirmed that these are the Amersham AMM foils.

- I told him that I cannot find any SSD for ACADA units that use Amersham AMM foils. The only SSD for ACADA devices that I find are authorized to the Army, which use NRD A-001 foil sources. I told him that I had to be sure that the replacement foils would not invalidate the device registration. He said that he would get me device registration number information.

He also said that they have not made a final decision on the Fredericksburg, Virginia location of use. I reminded him that we cannot issue the license without a location of use address.

I called him back a minute later, because I had forgotten to discuss the mailing address. At the moment, they have listed a mailing address in the state of Maryland, and we assigned a 19-license number to reflect mail going to Maryland. He stated that, once the location of use is selected, they will have mail sent there. I told him that they need to specify that the location of use will also be the mailing address, and that we will have to issue the license with a 45-number to reflect mail to Virginia. He said that they would do so.

Action Required/Taken: telecon record to LAT for inclusion in ADAMS. Call back by 2/18 if information is not received.
