

TELEPHONE CONVERSATION RECORD		
Licensee Name: Advanced Programs	Date: February 1, 1005	Time: 2:15 pm
License No.: 19-30986-01	Docket No.: 030-36810	Control No.: 136258
Licensee Contact: Rodney Dodd	Telephone No: 540-846-0725	
NRC Contact: Betsy Ullrich	Telephone No: 610-337-5040	
Subject: source/device information; mailing address		
<p>I spoke with Rodney Dodd regarding the material to be handled:</p> <ul style="list-style-type: none"> - he confirmed that they will be handling foils, replacing foils into detectors cells of Navy ACADA units. He confirmed that these are the Amersham AMM foils. - I told him that I cannot find any SSD for ACADA units that use Amersham AMM foils. The only SSD for ACADA devices that I find are authorized to the Army, which use NRD A-001 foil sources. I told him that I had to be sure that the replacement foils would not invalidate the device registration. He said that he would get me device registration number information. <p>He also said that they have not made a final decision on the Fredericksburg, Virginia location of use. I reminded him that we cannot issue the license without a location of use address.</p> <p>I called him back a minute later, because I had forgotten to discuss the mailing address. At the moment, they have listed a mailing address in the state of Maryland, and we assigned a 19-license number to reflect mail going to Maryland. He stated that, once the location of use is selected, they will have mail sent there. I told him that they need to specify that the location of use will also be the mailing address, and that we will have to issue the license with a 45-number to reflect mail to Virginia. He said that they would do so.</p>		
Action Required/Taken: telecon record to LAT for inclusion in ADAMS. Call back by 2/18 if information is not received.
