Subject: Implementation options for the Manual Actions rule

I am trying to help SPLB decide how they want to resolve both the manual actions and the associated circuits issues. I have updated the attached Options/Pros and Cons paper to provide them with information on the rulemaking challenges associated with the various alternatives. Please review my paper and let me know if I have omitted or misrepresented any of the associated issues or options. I am purposely **not** making a recommendation at this time since I am hoping to assist SPLB in making their own informed decision.

I would appreciate your comments on the attached paper by cob tomorrow.

Thanks Very Much!!!
