Subject: Response to your comments on Manual Actions Options

I have reviewed your comments from this morning and have revised the Options paper to provide a more balanced view of the issues you raised. Pls review the paper as soon as possible to see if I have missed anything. If you still have concerns, I would ask that you provide line-in/line out changes to the paper. Your immediate review would be appreciated since we need to go forward promptly on these fire protection issues.

Thanks!

Dick Dudley
