Subject: Fwd: Draft Slides for ACRS FP SC presentation on OpManAx

Based on comments received, I've made only a small change to the last slide. I propose going with these for the dry run on Wednesday.

Subject: Draft Slides for ACRS FP SC presentation on OpManAx

Attached are my draft slides for Friday's presentation. Note that I'm proposing limiting the discussion to the acceptance criteria (with a brief history as an intro), i.e., I have not included any slides on the subsequent "rulemaking" plans or schedule. This is partly for convenience and partly assuming that the ACRS is mainly concerned only with the "technical" aspects (primarily feasibility vs reliability). Let me know if you think "rulemaking" slides should be added. The allotted time is 15 min to present and 15 min to answer questions, so 10 slides is probably a maximum. If "rulemaking" slides need to be added, please suggest where other material could be deleted to keep the total number at 10.
