- 13 RG 1.75 being revised

17-2

**From:** Mark Salley  
**To:** FPPG  
**Date:** 4/13/04 7:44PM  
**Subject:** Agenda for April 14, 2004 FP call

Good Evening,

We are all set for the monthly FP call tomorrow @ 10:00 Eastern. Eva has arranged a conference room and bridge line (with 15 lines!) for the monthly call. The number is (800) 369-1126 with a passcode of 11262 the leader's name is EVA BROWN and the meeting room is O9B4. This is reserved for 10:00 -11:30am.

One area I need to improve is documenting the calls. To improve this, I have created a "Template" with the agenda (See attachment MonthlyFPcallApril04). After the meeting, each topic lead will provide their input to James Downs who will complete the templet. With Jim's help, I should then be able to issue the summary to the FP Section Chief in short, painless order. If I missed any topics, please bring them to our attention tomorrow @ the beginning of the call & we will add them.

The second attachment (acknowledgment), Jim Downs will discuss during the call.

The third attachment (coal train-1.pps) is a slide show FYI. I wonder if the rail roads are risk-informing their fire protection programs??? For example, what is the probability of a coal train, having a brake overheat (ignition) and ignite the coal (fuel) while the train is stopped over a wooden trestle (fuel again)?? 1 x 10 E^8?? 7?? 6?? 5?? 4?? 3?? 2?? 1?? 0?? :o)

We in NRR look forward to hearing from you on the call tomorrow. Until then,

Be safe,

MHS
