**Subject:** RE: Request for Model Numbers of NI-63 electron capture detectors

Jenny,

To my knowledge all of the GCs were sold to us as generally licensed gas chromatographs. I've attached a revised version of my first letter to include the model numbers and activity for our electron capture detectors.

Please accept my apology for not getting you this information correctly the first time. If you need anything else, please don't hesitate to let me know.

Regards,

Peter Frick  
Laboratory Director  
STL Connecticut

Subject: Request for Model Numbers of NI-63 electron capture detectors

On Jan.5 I asked for the Make and Model No. of the Ni-63 foils or plated sources in your gas chromatographs. I do not want the serial nos which you sent instead. Are the Ni-63 foils all 15 millicuries each or are some 2 millicuries? Agilent has the following Model numbers :

Model 2-6195 2mCi Ni-63  
Model 18803-60520 15 mCi Ni-63  
Model 18713A or 19287 15mCi Ni-63  
Model 19303 15mCi Ni-63  
Model G1224A or G1536A 15mCi Ni-63  
Model 19235 15 mCi Ni-63

Please submit the Model No. for each of you 13 Electron capture Detectors in your GCs. The Model No. should be right on the ECD housing. Also give me the millicurie strength of each unit.

Could it be possible that some of the 13 GCs werer sold to you as Generally licensed gas chomatographs.

I need these Model Nos so I can proceed with the renewal
