Kewaunee, WI 54216-9511

SUBJECT: KEWAUNEE NUCLEAR POWER PLANT - RESPONSE TO GENERIC LETTER  
2004-01, "REQUIREMENTS FOR STEAM GENERATOR TUBE INSPECTIONS  
(TAC NO. MC4826)

Dear Mr. Lambert:

On August 30, 2004, the Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 2004-01, "Requirements For Steam Generator Tube Inspections." The purpose of GL 2004-01 was to obtain information that would enable the NRC staff to determine whether licensee's steam generator (SG) tube inspection programs comply with the existing tube inspection requirements (the plant technical specifications in conjunction with Appendix B to Title 10 of the *Code of Federal Regulations* Part 50 (10 CFR Part 50, Appendix B)).

By letter dated October 28, 2004 (ML043140252), you responded to GL 2004-01 for Kewaunee Nuclear Power Plant (KNPP). The staff's review of your response to the GL did not identify any concerns with the inspection practices employed at KNPP. The staff, therefore, concludes that your SG tube inspection practices are in compliance with the existing tube inspection requirements.

If you have any questions regarding this matter, please contact me at (301) 415-2296.

Sincerely,

/RA/

Carl F. Lyon, Project Manager, Section 1  
Project Directorate III  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

Docket No. 50-305
