Subject: Threat of terrorist attack on nuclear reactors

DOCKET NUMBER

PETITION RULE FRN 7312  
(69FR 64690)

I am writing in support of the petition brought forth by the Committee to Bridge the Gap titled "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors". (Federal Register 11-8-04, Vol. 69, No. 215). As a physician I am concerned about the long term health consequences should such an attack attempt be successful, not to mention the immediate deaths and injuries. As with any plan, I am sure careful consideration will result in some modifications but I urge you to see that upgraded regulations are made and then enforced.  
Thank you , Jane Koopman, M.D.
