DOCKET NUMBER

PETITION FILE FROM

73-12
(69 FR 64690)

I am writing about upgrading your security at nuclear power plants in the United States.
Security needs to be validated at all nuclear power plants in the US.

A group "Committee to Bridge the Gap" has filed a petition with you. I am commenting in support of that petition.

The petition is on "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors."

I support constructing shields of I beams and steel cables to obstruct the angle of air attack at stand off distances from the reactor building, fuel pool and other safety-related assets so that hijacked rented or private aircraft attempting to deliberately crash into a reactor would be torn up in the shield effectively reducing the impact and penetration force on structures.

This is a sensible and inexpensive thing you could do to make Americans safer.

I hope you will do it.

Sincerely and in peace,

Judi Poulson
