DOCKET NUMBER

PETITION RULE PTH 73-12
(69FR 64690)

I strenuously urge you approve rulemaking to protect nuclear reactors against terrorist attack from the air, water, underground by one or no limit to the numbers of terrorists. I think it is absolutely imperative that these sitting ducks with their "come strike me cooling towers" on the landscape not only be made literally invulnerable but also appear to be so. I look forward to hearing of your ruling favorable to my request. Thank you Faith Young.
