Subject: Urge immediate action to protect the US from terrorist attacks on nuclear sites

NRC:

We are deeply concerned about the vulnerability of nuclear power plants and other nuclear sites to terrorist attack.

We wholeheartedly support the petition before the NRC for "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors."

The terrorist threat to these sites is real, and it is very likely imminent. The need is immediate. In the aftermath of Chernobyl, the catastrophic results of inaction are all too readily imagined. We therefore urge the NRC to take all necessary steps to protect the citizens of the US from terrorist attacks on our nuclear power plants.
