Subject: Re: Security Upgrades at Nuclear Power Plants

Secretary
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Attn: Rulemakings & Adjudications Staff

I am deeply concerned about nuclear power plant insecurity. Not only for myself, my family, and the uniquely beautiful area we live in on the Central Coast, but for all the other reactor communities across this country.

Our entire country has taken on the resposibilities unique to this power source; its undebatable radioactive elements, particularly managing and safeguarding its wastes for THOUSANDS of years to come.

We owe it to the earth and all its inhabitants to DO WHATEVER CAN BE DONE, specifically "Upgrading the Design Basis Threat Regulations for Protectrion Against Terrorist Attacks on Nuclear Reactors".

THIS IS NOT TOO MUCH TO ASK, and ultimately a small price to pay in comparison to the security benefits.

Thank you for your consideration.

Sincerely,

Susan Biesek
